

Dear Resident:

The United States Environmental Protection Agency (EPA) and its contractors have marked the asbestos-containing material (ACM) with spray paint on your property. Within the next week, work crews will arrive and remove the ACM. We will attempt to notify you within a day of the arrival of the work crews. The following are safety precautions that should be taken during removal activities at your home.

1. Keep windows and doors closed.
2. Turn off air conditioning facing the work area while work crews are present.
3. Yellow caution tape will be placed around the work area for your protection, please do not cross into this area.
4. Keep pets secured and away from the work area.
5. We will have heavy equipment and trucks around your residence, please exercise caution.
6. Please avoid the yellow caution tape areas until the tape is removed and the area is restored.
